Website:-

Projects | Intern | Experience

Food-Delivery-App |ReactJs | MongoDB | Express | NodeJs | Stripe Payment

- In this Full Stack Food delivery app project we will create the Frontend website, Admin Panel and Backend server.
- I created the user authentication system so that anyone can create an account and login to this food order website.

Text-to-Image Generator |ReactJs | MongoDB | Express | NodeJs

- I made a Text to Image generator App that allows you to generate images using AI.
- I have made the credit system to generate the image and users can purchase more credits using the online payment gateway that we have integrated in this app.

Plant-Identification-Using-Machine-learning| Python | ReactJs | Machine Learning

- This is our group project made with my Teammate that is to identify the plant.
- Using the machine learning model ResNet50.

Cyber Security Control | INTERN AT ASSOCIATED IT CONSULTANTS PVT. LTD   06/2023 -07/2023

- Implemented cybersecurity controls to safeguard systems and prevent vulnerabilities.
- Developed strategies to identify, mitigate, and prevent security vulnerabilities.

Education

Sharad Institute Of Technology College Of Engineering | BTech CSE   **2021- Present**
 CGPA – 7.02 (SEM 6)

Rajaram College | HSC Science   **2021**
 Percentage- 72.50%

Sou. Ambubai Patil English Medium School | Kolhapur   **2019**
Percentage-78.00%

Skills | Certification

Python | JAVA | C | MongoDB | Javascript | HTML | Tailwind CSS | ReactJS |NodeJs
MySQL | Operating System | Computer Networking | Data Structure | Data Structure And Algorithm |
Machine Learning | Git & Github
